

North of England Dobermann Club Championship Show 13.7.14

Many thanks to the NEDC Committee for inviting me to judge their Golden Anniversary Show, thank you also to their hospitality which was much appreciated on my first CC appointment.

The weather on the day was kind and we didn't experience any rain so judging was outside, once the field area had been examined judging was able to commence.

On reflection of the dogs exhibited I found that several male heads were wide in skull with many round eyes, movement left a lot to be desired in males and females. Only a handful of males possessed qualities including good lay of shoulders in the majority that our breed should have. Bitches were a different kettle of fish, the girls outshone the boys today although again quite a few heads were large and not feminine. That said I do thank exhibitors most sincerely for entering especially as there was another championship show the day before, our hobby becomes more expensive as each year passes.

MPD 2 entries (abs0)

1st Moore, McPhee and Jones - Korifey Onyx - BPD & RBPIS

6 months black/rust boy.

Lovely head on this baby, level planes with flat skull, enough stop, dark almond eye, flat cheeks, enough length and depth on the muzzle, pleasing expression, tidy front, not wide with straight legs, strong pasterns. Elegant arched neck flowing through clean withers, sloping top line with good tailset.

Forechest well filled out with depth dropped below brisket, tight into his elbows with enough tuck up, shoulders to upper arm of equal length and well placed, enough bend of stifle, just enough thigh muscle for his age, not overdone. Very sound on the move. Beautiful in outline, elegant and pleasing to the eye.

2nd Gregsons - Amazon Blackpark Louis Vuitton

7 months black/rust boy, another well made puppy, heavier in body than 1.

From the front, head is strong and masculine, with dark eye and enough stop, front needs to tighten, well off for bone.

From the side again head is strong with neck flowing through clean withers, firm sloping topline and another with a good tailset. Plenty of depth on this boy, close again into his elbows, well muscled back end, did seem a little understacked though. Preferred the front and the rear movement of 1.

Straight front legs with good round bone, tight feet with strong pasterns, forechest well filled out with depth below brisket and enough tuck up, firm sloping topline with good tailset. Enough sweep of stifle with muscle to first and second thighs, steady and sound on the move but in challenge for BPD preferred the rear movement of the minor puppy.

2nd Nerak American Idol

Not the strength in head as 1, little narrow in front, enough length on the muzzle, neck flowing through clean withers, topline slightly sloping, straight stifle, not the movement of 1.
